Stainless Steel Fire Hose Fittings

Fire Hose Couplings, Branch Pipes and Landing Valves are important fire fighting accessories. NewAge manufactures a complete range of the same in stainless steel conforming to IS:3444 GR I or GR IV. These fittings are having approval of ISI.

Stainless Steel is a versatile material which has the combined advantages of both gunmetal and aluminum alloy. Stainless Steel possesses far greater strength resistant and hence suitable for salt water service and coastal or corrosive environments. Stainless Steel has practically zero scrap value and so is safe from pilferage.

It is evident from the above, where quality and pilferage are the concern, the obvious choice or material for Fire Hose Fittings is Stainless Steel.

Branch Pipe

Specifications

- Fire Hose Couplings, 63mm. male and female instantaneous type, bearing IS:903 mark.
- Branch Pipes, 63mm. male instantaneous inlet with different bore nozzles, bearing IS:903 mark.
- Landing valves, having 75mm. N. B. flanged inlets, 63mm. female instantaneous oblique outlets, bearing IS:5290 mark.

Landing Valve

Product	Test Pressure
Branch Pipe	21 Bar
Landing Valve	
Coupling	

Advantages

- High Strength
- Corrosion Resistant
- Pilfer Proof
- ISI Approved

Coupling
